

Reagent Sets

for use with Modular-Lab cassette-based synthesizers

Reagent Sets

for the synthesis with Modular-Lab PharmTracer and Modular-Lab eazy

Description

To facilitate the daily work with ^{68}Ga , Eckert & Ziegler is offering ready-to-use reagent sets. They can be used with the synthesis devices Modular-Lab PharmTracer, Modular-Lab PharmTracer Tower and Modular-Lab eazy and include all chemicals and hardware required for the specific synthesis. The chemicals and hardware are tested for bioburden.

The reagent sets are intended for the production of pharmaceutical products and must be used by qualified personnel only. They are not intended and not suitable to be used directly and/or unprocessed in humans.

Reagent set for the labeling of DOTA-conjugated peptides, PSMA-11 (HBED-PSMA) and PSMA-617 with ^{68}Ga

All components of EZ-102 are manufactured according to ICH Q7A - GMP Standards for APIs. A shelf-life of 18 months can be guaranteed.

Reagent set available for	Article No.
Acetone free pre-purification of ^{68}Ga DOTA-peptides, PSMA-11 and PSMA-617	EZ-102

Sets except precursor.

We are working on the development of further reagent sets for different applications.
